## Water Conservation Program

**SLOW the FLOW**  
**INDOORS**

### What is Slow the Flow Indoors?

Slow the Flow indoors is a **free** indoor water use inspection program. The indoor water audits are performed by trained auditors.

### What happens at the inspection?

An indoor water inspection includes the following:

- ◆ A one-on-one consultation to analyze your indoor water use
- ◆ Test to determine if any of your fixtures are leaking water
- ◆ Showerhead and faucet aerator installation
- ◆ A personalized cost benefit analysis of fixture replacement
- ◆ A trained auditor will install low flow showerheads and faucet aerators, at no charge to you!

After the inspection you will receive a customized breakdown of where your water is used indoors and which appliances use the most water, a cost benefits analysis and more.

**Request an Inspection** –Complete the request form online at:

[ConservationCenter.org](http://ConservationCenter.org) or Call:

Phone: **303-999-3820 ext. 217**
